Progress MOVEit 2020 Improves Secure File Transfer for Remote Workforces and Provides Native Support for Hybrid Cloud Architectures

May 28, 2020

New release introduces free enhanced mobile app and eases scaling and integration

BEDFORD, Mass., May 28, 2020 (GLOBE NEWSWIRE) -- Progress (NASDAQ: PRGS), the leading provider of application development and digital experience technologies, today announced the release of Progress® MOVEit® 2020, the secure, automated Managed File Transfer (MFT) solution that can be deployed on-premises and in the cloud. The new release comes equipped with MOVEit Mobile 2.0, as well as enhanced cloud, integration and performance capabilities.

“Demand for secure file transfer in hybrid environments has increased over the past few months as large files are being exchanged with remote team members and partners in virtual work environments,” said Stewart Bond, research director, Data Integration and Intelligence software research at IDC. “MOVEit 2020 is putting these abilities into the hands of non-technical users, while ensuring the security and integrity of sensitive data.”

Accelerated by the recent pandemic, file transfer demands are increasing as the ability to quickly and easily share and access information securely are at an all-time high. Although businesses need just-in-time information, regulatory compliance requirements, if left unfulfilled, can result in expensive fines, damage to reputation and even loss of business. The latest release of Progress MOVEit addresses these concerns by enabling users to leverage a mobile device to securely upload information as well as access data remotely, while maintaining security and compliance requirements.

“We are in a new era of remote workforces, portable medical facilities and social distancing that requires flexibility of engagement. Yet in the case of healthcare workers, for example, security cannot be sacrificed as we adapt to these new working conditions,” said John Ainsworth, SVP, Core Products, Progress. “Progress MOVEit assists critical remote workforces by enabling both access to and the ability to gather data via any number of portable devices safely and securely.”

New in Progress MOVEit 2020 file transfer solution:

- **MOVEit Mobile 2.0 –** Free in MOVEit 2020, the app provides upload, download and file management support for mobile MFT access with increased security capabilities – making mobile use, scaling and integration easier than ever before. It also now supports MOVEit Cloud, multi-factor authentication (MFA) and secure folder sharing. MOVEit Mobile 2.0 is available now for iOS and Android.

- **Native support for Azure Blob storage –** Native support now provides more options for integrating MOVEit into hybrid cloud architectures, capturing detailed file histories without requirements for custom scripting.

- **Ad hoc classification –** The ability to customize security classifications in any language on any package that can be enforced as mandatory by the administrator. Built in response to customer requests, the Government of Canada stated, “This ad hoc classification feature is exactly what we needed, and Progress has delivered exactly what we had in mind.”

- **Re-designed MOVEit Gateway** -- Makes it simpler to set up SSH tunnel configurations with MOVEit Transfer. Built using secure, updated SSH server/client technology, the new MOVEit Gateway reduces the impact of customer security settings on the tunnel and provides improved logging to help debug any configuration challenges.

“The volume of information being accessed by any number of end-users, customers or partners for any business on any given day is growing with no signs of slowing. At the same time, businesses need to manage this information in a way that provides easy access, yet meets stringent compliance and security standards,” added Ainsworth. “With today’s release of MOVEit, Progress is helping customers address these challenges with technology that is easy to use, flexible and secure. Progress understands the critical needs of today’s businesses because we’ve partnered with thousands of customers, providing them with a variety of tools and technologies to improve business functions and stay competitive.”
