

Progress and Software Improvement Group (SIG) Partner to Address Quality Assurance and Security of OpenEdge Applications

September 26, 2023

The strategic technology partnership offers guidance for Progress OpenEdge customers on modernization efforts, lowering maintenance costs and strengthening their enterprise applications

BURLINGTON, Mass., Sept. 26, 2023 (GLOBE NEWSWIRE) -- Progress (Nasdaq: PRGS), the trusted provider of application development and infrastructure software, today announced a partnership with [Software Improvement Group \(SIG\)](#), an independent technology and advisory firm for software quality, security and improvement, to help ensure the long-term maintainability and modernization of business-critical applications built on the [Progress® OpenEdge®](#) platform. This collaboration provides OpenEdge customers with automated guidance through Sigrid®, SIG's software assurance platform, on areas to focus on when addressing technical debt and modernizing applications.

Organizations have a persistent need to maintain and modernize their mission-critical business applications. The partnership between Progress and SIG addresses this need by providing a comprehensive overview of the health of users' applications, offering detailed insights and guidance on all aspects of quality and security. It provides guidance per system to prioritize modernization efforts and support the execution of software development.

Progress will offer OpenEdge users access to Sigrid's powerful capabilities, enabling them to measure the code and architecture quality of their applications, and support the smart modernization of their OpenEdge applications. OpenEdge customers can proactively address potential issues and extend the longevity of their applications.

"Our partnership with SIG is important as it provides a unique opportunity to extend the value that OpenEdge provides by offering greater insight into the quality of the application code supporting mission-critical applications that our customers depend on," said John Ainsworth, Executive Vice President, General Manager, Application and Data Platform, Progress.

"The partnership between Progress and Software Improvement Group showcases our shared vision of helping organizations build healthy, future-fit software that supports the business of tomorrow," said Bart Fehmers, CEO of Software Improvement Group. "The integration of Progress' industry-leading OpenEdge platform with SIG's renowned software assurance platform, Sigrid, sets a new standard for software health management and application modernization in the market."

OpenEdge is the leading platform for developing enterprise applications needing high-performance, high availability and flexible deployment options for extensibility, scalability, security and reliability. Developers around the world use the OpenEdge application development platform to build innovative business applications that are the backbone of healthcare, financial services, manufacturing and other industries.
