## Progress Software Announces Management World 2009 Presentation Schedule

**Nice, France – May 5, 2009** – [Progress Software Corporation](#) (NASDAQ: PRGS), a global provider of application infrastructure software used to develop, deploy, integrate and manage business applications, will lead a presentation about space communications at Management World 2009 in Nice, France.

John Wilmes, Chief Technical Architect, Communications Sector, Progress Software, will co-present a case study session entitled *Mission Collaboration and Service Management in Space Communications* on Wednesday, May 6 from 4.00pm-5.30pm.

The case study presentation will show how future satellite communications will be managed by Policy-based Management and TM Forum Solution Frameworks. It will describe:

- | The rising demand for interoperability and effective management of overarching services with mission sensitive transport frameworks
- | How the main goal of the international Cross-Service Provider Catalyst is to design an operation-oriented management solution that focuses on high level policies
- | What the Operation Scenario is and that in order to best showcase functional areas, an international cross-organisation operation scenario is created

Progress Software will also participate in two catalysts with a team of system integrators and suppliers. The teams will take a collaborative approach to devising a solution that culminates in a series of live demonstrations.

In addition, *Business Transformation with TM Forum Solution Frameworks and SOA*, the latest book in the series that describes how to adopt and apply the TM Forum's solution Frameworks, will be launched at the event. The book is co-authored by Iwan Gramatikoff and Serge Garcia of Edelweiss Consulting and John Wilmes who is also co-chair of the TM Forum's SID Technical Program.

### **About [Progress Software Corporation](#)**

Progress Software (NASDAQ: PRGS) a provider of leading application infrastructure software to develop, deploy, integrate and manage business applications, sponsored the publication of the book. Included with each book is an up-to-date version of the Information Framework which can be explored with the Progress® DataXtend® SID Model Browser. You can also identify the differences between versions of the SID, currently at Version 8.
